

## Why you need Care, Custody or Control Liability Insurance

Did you know you could be held personally responsible for the entire value of a non-owned animal injured or killed while in your care? In many cases, buying a farm or stable liability policy isn't enough.

For instance, even if you have one of these two policies, you might still be held responsible if:

- An animal boarded at your farm is injured attempting to jump a fence.
- A fire or other cause results in the injury or death of an animal boarded at your farm.
- An employee of yours leaves a barn door open or forgets to lock a gate and an animal boarded at your farm gets out and is injured or killed.
- Any one of countless other possible incidents that might occur while an animal is in your care.

With Care, Custody or Control coverage, you are protected against liability resulting from death or injury to non-owned animals in your care. The Care, Custody or Control liability insurer will defend you and will be responsible for making payments if it is decided that the claim is due to negligence in accordance with the terms of the policy. Your agent will be happy to explain this coverage in greater detail.

**Insured's Name & Address:**
